

Users Stories starting point

- User stories related to licenses on old software working and being able to use old software
 1. As a user, I want to download the software so that I can enter my license key.
 2. As a user, I want to input a license key and the software activate and work.
 3. As an administrator/manager, I want to be able to purchase license keys that will work when inputted and allow the software to be used.
 4. As a user, I want to install and use the software after inputting my license key and the software being activated.

- User stories related to new software on web based system.
 5. As a user I want to be able to create a new client or revisit a previous one
 6. As a user, I want to be able to import unique information about a client when creating a new one
 7. As a user, I want to be able to import or create notes about a client if there's important patient history
 8. As a user, I want to be able save new clients to be later visited
 9. As a user, I want to be able to conduct new tests
 10. On the test, I want to be able to clarify who is the clinician who is performing this test.
 11. On the test, I want to be able to write important notes if need be.
 12. On a test, I want there to be two default tests to be available (New DWT and New RDDT)
 13. When a test is selected, I want the list of words to show for the left and right ears
 14. When a test is selected, I want to be able to quickly be able to swap the list of words from right to left in case of incorrect device position (with appropriate prompting message)
 15. When a test is selected, I want to be able to select which condition I want to test to be directed (directed right, directed left, free direct)
 16. -When a test is occurring, I want to be able to allow for complete playback control (pause, play, and audio timeline)
 17. When a test is occurring, I want to be able to click on the words/numbers the client heard correctly to appropriately tally an ear's dominance

18. When a test is occurring, I want to be able to see a score (percentage) for each ear based on valid client responses
19. When a test is occurring, I want to be able to see an interpreted diagnosis based on the score of the client's responses
20. When a test is occurring, I want to be able to see an interpreted ear advantage based on the score of the client's responses
21. As a user, I want to be able to save a test once I've concluded my results (logging the date and time when finalized)
22. As a user, I want to be able to conduct as many tests as I want/need on a patient
23. As a user, I want to be able to evaluate a client's tests, of whichever I choose (minimum of 2), and get an interpretation of a dominant ear
24. As a user, I want to be able to get a report of a client's results from the tests along with the finalized interpretation subscription status.
